

Ben Adamsky

Co-founder and CTO at Dreamwork. hi@benadamsky.com

Work

Dreamwork

Co-founder, CTO, 2026 - now.

Dreamwork is an agent-first job search platform. I am the co-founder and CTO.

Most days are spent on the agent runtime, the matching pipeline, and the parts of the product that make a job hunt feel less like a second job.

Ponder

Co-founder, CTO, Dec 2023 - 2026. Social surveys and prediction games on Farcaster.

- Grew to over 100,000 users on Farcaster
- Built the prediction game: 590,000 on-chain votes from 21,000 voters, with 42,000 wallets set up through the app

Freeport

Software engineer, Dec 2022 - Apr 2024. A platform for fractional fine art investing.

- Core engineer on the launch of a collection of Warhols that generated over \$150,000 in revenue within the first six weeks
- Designed and delivered platform features end-to-end: API routes, backend models, and the analytics pipeline
- Built the virtual art gallery that hung tokenized real-world assets alongside NFTs
- Worked with the CEO and CTO on growth features, including the referral and collector programs

Upwork

Freelance React developer, Dec 2018 - Dec 2022.

- Freelanced for clients from seed-stage startups to enterprises
- Top Rated within the first year, then Expert-Vetted, a distinction for the top 1% of talent on the platform
- Designed and built dashboards, onboarding flows, landing pages, API integrations, and responsive interfaces for web and native apps
- Wrote web and brand copy for businesses, including Lyft and Carnival Cruise Line

Kettle

Co-founder, COO, May 2021 - Jul 2022. Online events built for communities.

- Ran product from idea to launch: MVP iterations, user feedback, and the onboarding flow
- Managed four software engineers
- Built virtual event software with real-time activities

Branch

Founding engineer, Apr 2020 - Jan 2021. An immersive virtual HQ for remote teams.

- Built peer-to-peer spatial audio for virtual offices
- Part of the core team behind the MVP that raised \$15.5M from investors including Naval Ravikant, Sahil Lavingia, and Homebrew
- Made the major architectural decisions for the core app and the custom style library

Konjure

Co-founder, May 2018 - Dec 2019. A decentralized website builder.

- Built a peer-to-peer website builder that reached finalist status in multiple accelerator programs
- Contributed to the tokenomics of the KONJ token and to a desktop app for running validator nodes on IPFS
- Recruited for and represented the company at blockchain events in NYC and SF

Self-employed

Web and game developer, Feb 2014 - Sep 2016.

- Built websites, configured game servers, and wrote game plugins as side income during high school
- Contributed to several bootstrapped game and web hosting companies serving thousands of users, later bought out by larger competitors

Projects

- Surveycaster. Open source bot for driving engagement on Farcaster.
- Libs vs Cons. A satirical card game that debuted on Kickstarter.

Skills

TypeScript, JavaScript, React, Next.js, Node.js, PostgreSQL, Prisma, REST APIs, webhooks, HTML, CSS, Vercel, AWS.

Education

Coursework toward a B.S. in Computer Science, Rutgers, The State University of New Jersey, New Brunswick, Sep 2016 - Jun 2018.
